

Angélica Dávila Ramírez

Senior Engineering
Technologist at Duke Energy
Corporation
with expertise in Distribution
Engineering Design

Angélica Dávila Ramírez, originally from Toluca, State of Mexico, is an engineering professional with a distinguished career in the energy sector. She currently serves as a **Senior Engineering Technologist at Duke Energy Corporation**, where she has built her career in Distribution Engineering, progressing from Engineering Technologist II to her current position.

In addition to her professional career, Angélica is recognized for her **innate commitment to service and her dedication to diverse communities**. Her involvement began as a volunteer with El Centro Hispano in 2020, and since then, she has become a valued contributor to various organizations and community projects, generously sharing her knowledge, skills, and experience.

Since **November 2025**, Angélica has been a **certified Community Health Worker (CHW)**, further strengthening her commitment to community well-being and access to resources.

Angélica firmly believes that volunteers are the foundation of organizations working to advance rights, inclusion, and the well-being of diverse communities. Her leadership, generosity, and willingness to serve demonstrate how professional knowledge and experience can be used to create meaningful change in the community.

Her professional journey and, above all, her dedication to volunteerism make **Angélica Dávila Ramírez a committed, compassionate, and valued ally of diverse communities**, whose work and service continue to make a positive impact on the communities she serves.
